

### **7:30 AM-9 AM**

#### **IFMA Central Ohio FM Breakfast- Water Management Plan and Legionella**

Do you know what you're drinking and the kind of water your HVAC equipment is using?

In an effort to help you tackle this ever-- increasing important set of questions, we're going to have Phil Clark, Owner of the Tower Equipment Company, come in and talk about Water Management Plans and Legionella. Phil has over 26 years of experience in water treatment and cooling towers and has been a guest speaker at water related symposiums and seminars around the world. Here are some of the topics that Phil may touch upon:

- Cooling tower sizing, operation and optimization
- FDA 510K Certified water treatment systems for medical applications
- ASHRAE 188 Guidance to help minimize the risk of Legionellosis
- CMS Mandate to reduce Legionella risk in healthcare facility water systems
- CDC Legionella toolkit- Developing a Water Management Plan

\* In an effort to make sure that we have enough food, please register for this program at [www.ifmacentralohio.org](http://www.ifmacentralohio.org) and click on the Water Management Plan and Legionella link and follow the prompts
